PROFESSIONAL SUMMARY

Application support and business intelligence professional with 8 years in business-critical environments. ETRM energy trading is my foundation: Allegro at Naturgy and TRITON, GTA and VESON IMOS at Repsol Trading, writing my own SQL against Oracle and SQL Server for data validation and fiscal closings. Then two years of EU regulatory compliance on a SaaS platform used by thousands of companies, with process automation and internal tooling built with generative AI. Works in English daily.

TECHNICAL SKILLS

Data and business intelligence: SQL, Transact-SQL, Oracle, SQL Server, Microsoft Access, data validation and reconciliation, Microsoft Excel (advanced analysis)

ETRM and trading platforms: TRITON, Allegro ETRM, VESON IMOS (Veslink Nautical), GTA, SCPI

Automation and development: Power Automate, Python, JavaScript, Node.js, applied generative AI, Java

Support and ITSM: ServiceNow, Jira, Freshdesk, incident management, log analysis, SDLC, UAT

EU regulation: EUDR, CSRD, CSDDD, LkSG, CBAM, NIS2, EU Taxonomy, PPWR, PFAS, TPD

PROFESSIONAL EXPERIENCE

Peninsula HTM – Gibraltar — Oct 2026 – Present

Application Support & Business Intelligence Analyst

osapiens – Madrid, Spain (Hybrid) — Oct 2024 – Oct 2026

Senior Technical Support Engineer

- Provided level 1 and 2 application support across 12+ EU regulatory compliance modules (EUDR, CSRD, CSDDD, LkSG, CBAM, NIS2, EU Taxonomy, PPWR, PFAS, TPD) on a SaaS platform used by thousands of client companies, working in English
- Automated end-to-end regulatory reporting to the relevant European authority using Power Automate: ticket attachment ingestion, data validation, content-based routing, API calls, response verification and automated agent notification
- Built backend and frontend of a generative AI ticket analyser that recommends actions to team leads and spawns follow-up tasks
- Designed, built, tested and deployed a full-stack RAG support chatbot in JavaScript and Node.js on top of internal generative AI infrastructure, including the sync pipeline between the knowledge base and the vector index
- Built an in-house automated evaluation framework for AI services in Python — CLI, 13 check types and faithfulness, precision, recall and F1 metrics — across 59 datasets and 6 AI services
- Developed a Python automation deploying new versions to client virtual machines with no end-user action required
- Each automation frees 5-10 hours per agent per month, benefiting Customer Success Managers, support agents and onboarding managers
- Reproduced, troubleshot and documented bugs for engineering and qualified feature requests through log analysis and Business Object tracing on a proprietary cloud, within support teams of 5 to 8 people

  Technologies: *Power Automate, Python, JavaScript, Node.js, generative AI, RAG, Freshdesk, Jira, proprietary cloud, NoSQL, log analysis*

NTT DATA (formerly everis) – Madrid, Spain — Apr 2018 – Oct 2024

Solutions Analyst – Repsol Trading S.A. — Aug 2022 – Oct 2024

- Delivered level 1 and 2 support across trading operations, position validation and monthly fiscal closings within a team of 2-3, handling around 30 tickets per month

- Wrote SQL queries against Oracle and SQL Server to investigate incidents, cross-check data between systems and trace the origin of discrepancies in daily operations
- Managed the VESON IMOS maritime platform: voyages, policies, bunker cost estimates, freight costs, invoicing, master data and integration with corporate applications across the Repsol ecosystem
- Acted as primary point of contact between Veson IMOS and Repsol to resolve operational incidents and maintain service continuity
- Gathered and refined improvement requirements with business stakeholders, assessing technical feasibility and handing specifications to the development team
- Monitored daily operations and managed TRITON and GTA alerts to minimise impact on critical trading activity

Solutions Assistant – Repsol Apr 2020 – Aug 2022

- Delivered first-line functional support to business areas across TRITON, GTA and VESON IMOS in daily trading operations
- Provided functional assurance for the ETRM platforms and documented recurring cases and resolution procedures for the support team

Intern → Solutions Assistant – Naturgy Apr 2018 – Apr 2020

- Delivered first-line support on pricing, calculation formulas and report generation in Allegro ETRM for traders, operators, finance and back office
- Validated financial data quality by reviewing incorrect valuations across reports, comparing sources and tracing incorrect data back to its root cause
- Wrote SQL queries against Oracle and SQL Server to investigate incidents and cross-check information between systems
- Supported monthly fiscal closings, resolving settlement validation and record reconciliation issues within a team of 3-4
- Led training for the internal teams responsible for service maintenance

Technologies: *TRITON, VESON IMOS, GTA, Allegro ETRM, SCPI, Oracle, SQL Server, SQL, ServiceNow, Jira, Microsoft Excel*

CERTIFICATIONS

Allegro Associate – Functional Certificate – Allegro Development Corp. 2019

Business Analysis Professional Fundamentals – Microsoft and LinkedIn 2023

Data Analysis Professional Fundamentals – Microsoft and LinkedIn 2023

Software Development Professional Fundamentals – Microsoft and LinkedIn 2023

Additional LinkedIn Learning coursework (2019-2023): data analysis, data science, data storytelling, business analysis, data management, SQL, Excel macros and VBA, big data foundations and databases — 20 courses

EDUCATION

Advanced Technical Diploma in Multiplatform Application Development 2018

CampusFP Getafe – Getafe, Spain
